

Practical solutions for livestock safety

Project: Wangaratta Livestock Exchange – Browns Wangaratta on behalf of Wangaratta City Council

Sector: Councils

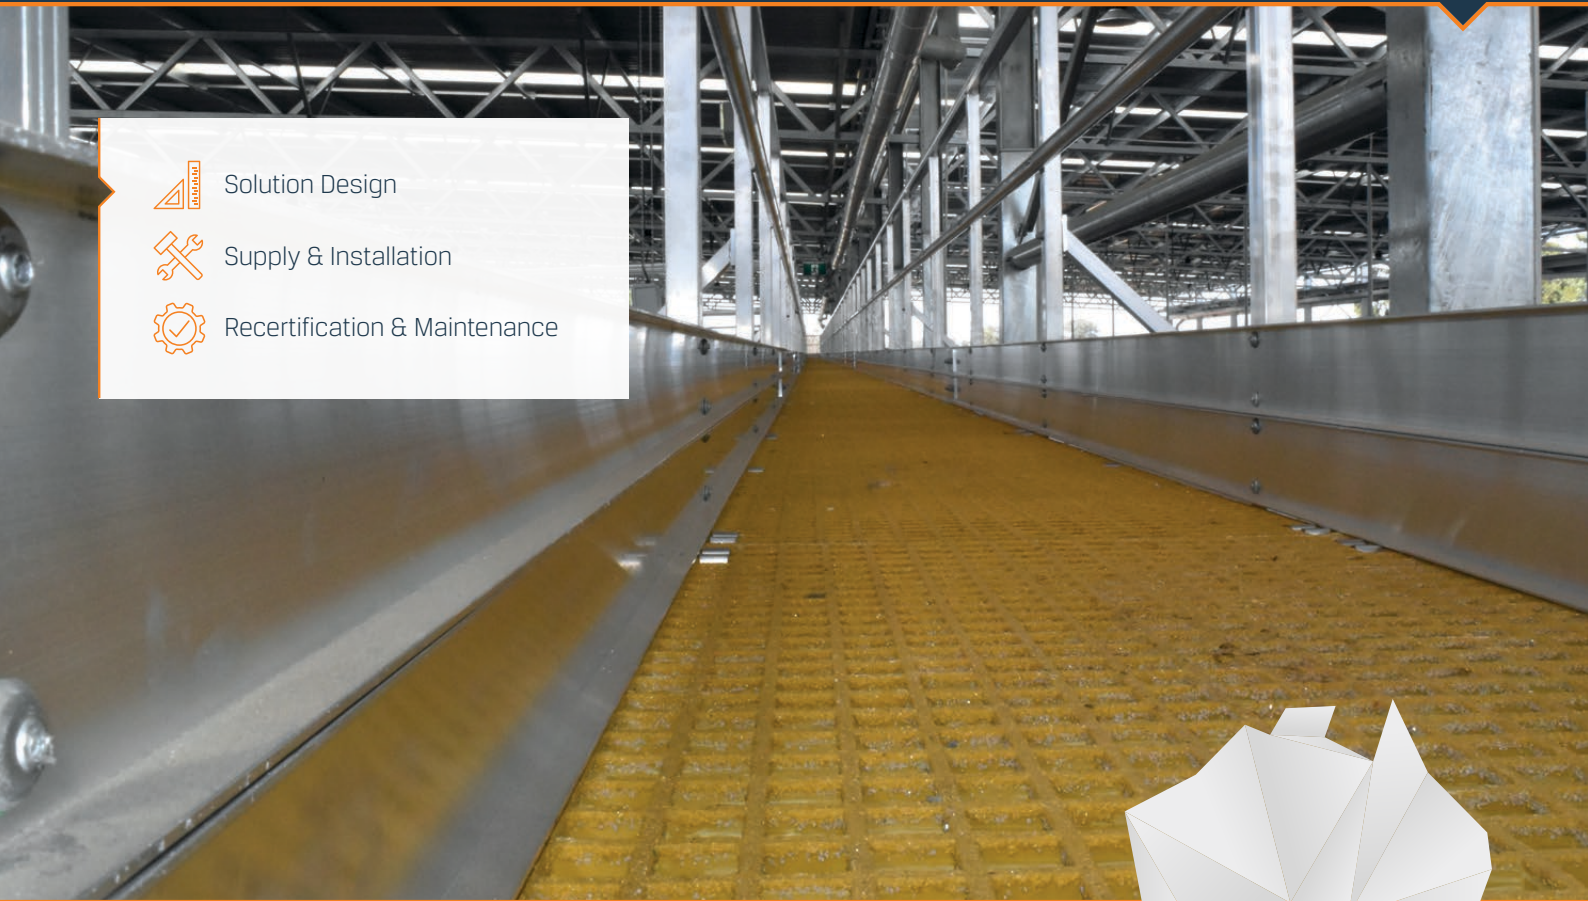

Solution Design

Supply & Installation

Recertification & Maintenance

The height of safety

Wangaratta Livestock Exchange is a working stockyard and cattle sale facility operating seven days a week. They required an upgrade to a 545m auctioneer's walkway to achieve full compliance with the Australian Standards. Anchor Safe has been working with Wangaratta Livestock Exchange since October 2010 and in that time have developed an in-depth understanding of the unique needs of their site.

Delivering results from top to bottom

We proposed a three-stage solution so the exchange could continue operating without interruption while the upgrade took place. Our new high span walkway was constructed along the same alignment as the existing walkway, attaching to the existing overhead bearers for support.

We used:

- 545m of KOMBI elevated walkway system, including extended posts and double kick rail
- 4 x FC7195 – ALTO Stairways 2300mm High x 600mm wide with 900mm landing including guardrail both sides

The project was completed to achieve a certificate of compliance to AS1657-2013. We worked closely with the local council and building surveyors, discussing the specifications at every step of the way to provide total peace of mind and ease.

Elevated Fibre Reinforced Polyester walkway with double sided guardrail, for auctioneers to walk along at the Wangaratta Livestock exchange.

Aluminium Stairway for access up onto the elevated walkway.

Quality workmanship by our qualified installation crew.
